

Workshop

“Advanced research data management – kadi-apy and workflows”

Goal

In this workshop, you will learn how you can use kadi4mat with minimum effort to facilitate your research data management.

The responsible and far-sighted handling of digital research data is becoming increasingly important. Management, storage, exchange and access to large amounts of data, including the corresponding metadata, is challenging.

During the workshop, researchers will acquire fundamental knowledge of kadi4mat in the first session, followed by learning how to interact programmatically with the rdm tool using Kadi API and the kadi-apy python library.

In the second session, we will illustrate workflows and kadistudio to create personalized workflows for automating and standardize research procedures.

Schedule

29 March 2023

12:30 – 16:30 hrs

The workshop will be held in Lise-Meitner-Straße 16, Ulm.

Workshop instructor: POLiS Research Data Officer Dr. Satish Kolli

Requirements

A computer with internet connection is required.

Registration

Please register [online](#) until 26.03.2023.

GS-EES members can gain 0,5 CP for the GS-EES qualification program within good scientific practice for attending the workshop in combination with an assigned task.
